Re: 2023 Irrigation Season Start Date, Water Rate, and Ditchtender Contact Numbers

Dear Water Customer:

We are thrilled to offer a full irrigation season this year. As of today, the Yolo County Flood Control and Water Conservation District's (District) total stored water supply is approximately 348,000 acre-feet. With the completion of canal system repairs and critical capital projects, we are prepared to start the 2023 irrigation season and anticipate increasing diversions in the Winters and West Adams Canals starting Friday, May 5.

At the May 2, 2023 Board meeting, the District's Board of Directors adopted the updated agricultural water rate. Effective today, the agricultural water rate for the **2023 irrigation season is \$55.90/acre-feet**. In addition to adopting the water rate, the Board of Directors adopted a Drought Reserve Policy; additional information is provided in the [Board meeting agenda package](#) and the [Board meeting presentation](#) posted on our website (<http://ycfcwcd.org/agendas.html>).

For your reference, the 2023 Ditchtenders' phone numbers, and ride numbers and map are attached. We encourage you to place your water orders directly through your Ditchtender, or if you are unsure of which Ditchtender is on duty, please call 530.662.1037 to be connected to the Ditchtender on duty.

We look forward to serving you during the 2023 irrigation season, please reach out with any questions, concerns, or suggestions at 530.662.0265.

Thank you,

Kristin Sicke  
General Manager
