February 5, 2024

Re: 2024 Irrigation Season Water Application

Dear Water Customer:

Enclosed for your use is the 2024 Water Application. This application, together with the appropriate acreage deposit, must be returned to the District office or postmarked no later than the close of business on **Friday, March 15, 2024**. For your convenience, there is a downloadable version of the application available on the District's website at [www.ycfewcd.org](http://www.ycfewcd.org). As always, District staff are available to answer any questions you might have regarding completing this application.

As of February 5, 2024, the District's total stored water supply is approximately 310,000 acre-feet (maximum supply is 450,000 acre-feet and full season supply is 245,000 ace-feet). ***Based on the current water supply and the average irrigated acreage over the last six years, the District will not be imposing an allocation this irrigation season.*** Water storage amounts are updated on our website ([www.ycfewcd.org](http://www.ycfewcd.org)) and provided daily during the week to the Daily Democrat for publication.

As noted above, applications must be in the office or postmarked no later than Friday, March 15, 2024. Please note that an application is not considered filed until the acreage deposit of \$5.00 per acre is received. Acreage deposits are credited to a water customer's account and will constitute a guaranteed minimum purchase for the 2024 season. Applications that are not complete will be returned to the water customer with a request for the needed information.

As we approach the irrigation season, the District will provide an update on reservoir levels.

If you have questions or need assistance in completing and filing your application, please contact Christina or Bonnie at the District office, or come into the office with your application.

Sincerely,

Kristin Sicke  
General Manager
